# Tron Googol Concept

A googol is a very large number. In decimal notation, it is written as the digit 1 followed by one hundred zeroes. The term was coined in 1920 by 9-year-old Milton Sirotta (1911-1981), nephew of U.S. mathematician Edward Kasner. Kasner popularized the concept in his 1940 book 'Mathematics and the Imagination' to give a sense of how big a googol really is. With Tron Googol you can earn over and over again. It is upon you to decide how big an amount you want to earn.

# History of Giving

  
**ASIAN  
CULTURE**

Members of a family will put in money to contribute to one family getting a business. All members will work at that one family's business until enough wealth is generated to open the next family's business.

  
**JAMAICAN  
CULTURE**

Individuals come together by giving designated person a certain amount of money on a weekly basis and at the end of the year that you have contributed is returned in totality. There is no additional profit is made on the contribution.

  
**HISPANIC  
CULTURE**

Families contribute a weekly set amount to a certain family for a set period of time. One the time is fulfilled, each family continues to contribute and the next family collects. There is also no profit made on this contribution.
